Re: Design Strategist, Executive Education (JR127080)

Dear Hiring Committee,

I am excited to apply for the Design Strategist, Executive Education position with ASU Learning Enterprise. Emma Fernandez first contacted me because ASU was seeking a learning professional with a corporate background, and she specifically identified my experience at Charles Schwab and American Express as relevant to the team's portfolio-wide course development and strategic work. That combination is the center of my candidacy: I have spent more than 15 years translating complex business, technology, compliance, and performance needs into learning experiences that professionals can understand, apply, and improve through feedback.

At Charles Schwab, I worked across instructional design, project management, and product responsibilities to create client-facing tool education and internal learning for onboarding, upskilling, compliance, and technology adoption. I partnered with subject matter experts, project owners, and business leaders; converted requirements into structured learning and performance support; and managed work through analysis, design, development, stakeholder review, launch readiness, and refinement. I also helped organize self-directed Learning Journeys and SharePoint learning hubs—experience that translates directly to a varied portfolio of career and professional learning.

At American Express, I currently support enterprise technology adoption through change management, instructional design, facilitation, project coordination, communications, and analytics. For a three-month Jira Data Center and Rally-to-Jira Cloud migration affecting a population of 60,000 users across seven groups, I personally coordinated and hosted all 59 live sessions across six global time zones. I developed materials, presented key topics, led discussions, moderated Q&A, coordinated subject matter experts and leaders, and managed post-session feedback and reporting. By combining surveys, session chats, transcripts, and stakeholder input—and using AI to assist with theme analysis while retaining human review—I helped translate learner evidence into recommendations for more interactive demonstrations and Q&A.

ASU's emphasis on access, innovation, and practical opportunity strongly resonates with how I approach learning design. I build for what learners need to do, choose modalities and tools that fit the context, collaborate candidly with stakeholders, and use quality review and learner evidence to improve the experience after launch. I bring hands-on experience with Articulate Rise and Storyline, Adobe Captivate, Camtasia, LMS environments, Webex, Qualtrics, and AI-assisted development, along with the judgment to evaluate new tools responsibly.

I would welcome the opportunity to bring my corporate L&D perspective, cross-functional design leadership, and commitment to clear, usable learning to ASU Learning Enterprise. Thank you for considering my application. I look forward to discussing how my experience can support executive education and strategic initiatives across the portfolio.

Sincerely,
Lorne Hopkins
